

DUAL-CHANNEL LOW TEMPERATURE LOGGER

LogTag®

UTREL30-16
Dual-Channel 30 Day
Low Temperature Logger

The LogTag® UTREL30-16 Dual-Channel Temperature Recorder measures and stores up to 32,000 temperature readings.

It features a large easy-to-read display and is designed to show 'at a glance' if temperature excursions have occurred during the current day and up to the previous 29 days.

The alarm is triggered if temperature readings are outside pre-set alarm limits which is indicated by a large X on the display and, if configured, the audible alarm will sound.
