#### INTRODUCTION

Antaira's LMP-0501-24 series is a 5-port industrial PoE+ managed Ethernet switch that is embedded with 4\*10/100Tx Ethernet ports that support IEEE802.3at/af for a maximum of 30 watts per port, and 1\*100Fx (SC or ST connector) fiber port with optional versions for multi-mode (2Km) and single-mode (30Km).

LMP-0501 series is a fully manageable industrial Ethernet switch with a pre-loaded Layer 2 network management web console that supports a low voltage redundant power input range from 12~36VDC with a voltage booster. This product series is IP30 rated, DIN-rail mountable, and has two wide operating temperature models for either a standard temperature range (STD: -10°C to 70°C) or an extended temperature range (EOT: -40°C to 75°C). It also provides high EFT and ESD protection for any industrial networking application within factory automation, ITS, power/utility, water wastewater, and any other outdoor or harsh environment.
